**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

### **DETAILED ACTION**

Applicant's Amendment filed 03/10/06 has been entered and carefully considered. Claims 1 and 24 have been amended. However, limitations of amended claims have not been found to be patentable over prior art of record, therefore, claims 1, 5-8, 24 and 28-31 are rejected under the same ground of rejection as set forth below.

#### **Claim Rejections - 35 USC 102**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action.

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5-8, 24 and 28-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Koppolu (US. 5,706,458).

As to claims 1 and 24, Koppolu discloses teaches a computer implemented method and corresponding apparatus for a unified user interface for an application comprising the steps/means for one or more component tables (commands that map to keystrokes, figure 1 , 112, underlined W of WordPerfect Help, underlined T of Technical Microsoft Word), wherein each component table corresponds to a component of the application (the commands under Help menu corresponds to a component of the application), each component table

includes at least one command for the corresponding component (at least one command "Technical Support" is included in "Help" component table), and each component table includes a description for adding the command to the user interface (figure 22, column 14, line 4 through column 16, line 10);

wherein each command has an associated priority (column 14, line 65 through column 15, line 5, each command has its priority based on the Count Array at figure 10).

and a master table merged from the one or more component tables, said master table comprising commands that map to keystrokes (figure 11, each menu table (1104, 1106) comprises a list of commands that map to keystrokes. Therefore, the merged menu list comprises a merged "commands that map to key strokes" list as well as the master table).

As to claims 5 and 28, Koppolu teaches each command and command vector having a flag specifying visibility. It was inherent that the "Technical Support " command is in Koopolu's system has a flag to let the user know the command enabling or disabling for user to use.

As to claims 6 and 29, Koppolu also discloses an additional component table and wherein the master table is merged from the at least one component table and the additional component table (the master table merges container menus with sever menus, column 5, lines 1-24, figure 11 , each menu table (1104, 1106) comprises a list of commands that map to keystrokes. Therefore, the merged menu list comprises a merged "commands that map to key strokes" list

as well as the master table).

As to claims 7 and 30, Koppolu teaches a removed component table of the at least one component table corresponding to a removed component and wherein the master table is merged from the remaining component tables of the at least one component table. It was inherent that the master table merges only "commands that map to the keystrokes" tables when server menu table of "commands that map to the keystrokes" is removed from a list.

As to claims 8 and 31, Koppolu also teaches the master table including available commands ("Quick Preview", "WordPerfect Help", "Technical Support" and "About Microsoft Word"), menus and toolbars and the location of each available command (figure 1).

### **Response to Arguments**

Applicant argues that Koppolu does not teach or suggest "each command has an associated priority". However, the Examiner respectfully disagrees.

As indicated in the specification, page 13, lines 16-20, the limitation "each command has an associated priority" is explained as cited: "priorities are assigned to each menu, toolbars, group and command. Figure 3C shows one example of utilizing priorities of items in a menu. Each group has a numeric priority within a menu or toolbar. Each command has a numeric priority within a group. For one embodiment, the space of numeric priorities is large (32 bits). Having priorities permits components to insert their commands at precise positions within the menu or toolbars".

The Koppolu's system shows the Count Array at figure 10 as the space of numeric priorities. Each different numeric Count Array has its own number (from 0 to 5) and is inserted by a command. Each command is inserted into the Array based on its priority. Because every command has a different priority to insert into the command table, they are inserted into the command table in order.

### **Conclusion**

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
